# ChemCart Reagent Inventory

...a web-based chemical reagent inventory system

From a web browser, scientists can use ChemCart Reagent Inventory to quickly locate reagents needed for synthesis, whether located in the lab next door or from suppliers around the world. ChemCart Reagent Inventory tracks reagent bottles from "cradle to grave" - from purchasing and receiving to movement through the laboratories and disposal.

ChemCart Reagent Inventory manages all aspects of a chemical reagent's lifecycle

- Search for in-house and supplier reagents, from a single structure query

- Use shopping cart to order chemicals from stockroom or from suppliers

- Receive order and track inventory history as sample is depleted

- Utilize barcodes and/or RFIDs to track bottle information

- Access inventory information from a single corporate site or from multiple sites

- Generate flexible reports for governmental health and safety agencies

- Link to purchasing system, safety information and other inventory related sources

- Add business rules to support corporate workflow (e.g. set ordering permissions)
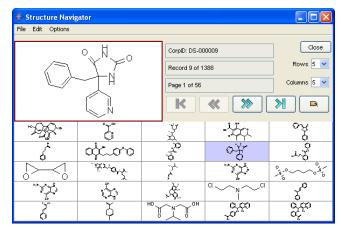

- Update/add your own reagents & suppliers

ChemCart Reagent Inventory features that benefit end users

- Easy to use, query by form interface

- Use pre-defined forms, modify or build your own form to query, view and update information

- Search by sub-structure and/or any data field through the form, or build more complex queries using AND, OR, NOT logic

- Extensive list handling capabilities – sort, merge, store, retrieve, print, share

- Batch load data from a variety of file types

- Supports several popular chemistry formats, such as Accelrys, CambridgeSoft, ChemAxon, Daylight, Symyx

*The configurable **Structure Navigator** eases the task of reagent selection.*
